

2015 NQDC/457(f) BUYER'S GUIDE

For companies that want to offer additional savings opportunities to certain participants who may be unable to save enough within the limits of their qualified retirement plans, a nonqualified deferred compensation (NQDC) plan may be an option.

Through these plans, companies or nonprofit entities may offer participants the opportunity to defer receiving and paying taxes on more of their salary and/or bonus than the Internal Revenue Service (IRS) guidelines permit in qualified defined contribution (DC) plans such as 401(k) or 403(b) plans.

NQDC can be an opportunity to boost participant savings for retirement or any long-term financial goal. As the plans are nonqualified, they are intended to be offered to a subset of participants, not to the entire qualified plan population. Because they are not subject to the qualified plan rules or testing, the plans allow for myriad design and funding options that plan sponsors may consider.

The various types of plans include mirror 401(k)s, which may exist alongside current qualified 401(k)s and 457(f) plans available to nonprofit entities. However, those are not to be confused with 457 retirement or pension plans that provide benefits to government employees and employees of tax-exempt organizations, for example.

In addition to offering multiple plan design options, nonqualified plans may also be paid for in several ways. They may be funded with assets held in trust or may be “unfunded,” whereby the employer incurs only a liability to the employee for the amount of income deferred, retaining use of the capital that would have otherwise been paid as salary. —PS

METHODOLOGY: The 2015 PLANSPONSOR Nonqualified Deferred Compensation (NQDC)/457(f) Buyer's Guide questionnaire was completed in May by providers of NQDC plan administrative services. All data are as of December 31, 2014. References to NQDC plans/liabilities/participants include only corporate plans subject to Section 409A, Section 457(f) plans, and nongovernmental Section 457(b) plans—i.e., ineligible plans. Service providers for state/local governmental 457(b) NQDC plans—i.e., eligible plans—will be profiled in our August issue. Profiles are meant to be representative of provider experience/capabilities. More extensive data is available for purchase or by contacting providers directly. For information on full survey results, email Brian O’Keefe at bokeefe@assetinternational.com.

HOW NQDC PLANS WORK

A nonqualified deferred compensation (NQDC) plan defers a portion of an executive's compensation—salary, bonuses, commissions or other earnings—to a future date, and the deferrals can be up to 50% of total compensation. The funds are typically paid out when the employee leaves the company, becomes disabled or dies. Because the funds are deferred, so are the taxes. This can be beneficial to an executive at retirement as he will be in a lower tax bracket. As it is non-qualified, an NQDC plan is not subject to the Employee Retirement Income Security Act (ERISA) and its nondiscrimination testing limitations.

An NQDC plan can either be elective,

whereby it is optional for the executive to participate and to determine the amount of salary he wants to defer, or a supplemental employee retirement plan (SERP), whereby the company enters a legally binding agreement to pay the executive supplemental income on top of his salary and bonuses. The deferrals can be placed into an account paying a set interest, or they can be invested.

There are some downsides to NQDC plans for both employees and employers. The benefits may be forfeited under circumstances including: if the employee leaves before the vesting date or before normal retirement age; if the person enters into competition with the employer; or if he is terminated for cause.

In addition, the funds are unsecured, which means they are not protected from the claims of general creditors of the company. Also, Internal Revenue Code (IRC) Section 409A says that an executive who chooses to defer compensation may not change that during the year, and once a date is set for when the participant wants to receive the money—say, to coincide with a tuition payment—it cannot be accelerated.

For the employer, unlike with qualified plans, contributions to an NQDC plan may not be deducted until they are paid out. In addition, the employer must pay taxes on any investment earnings, dividends or realized gains. —LB
