

Principal Diversified Real Asset CIT

Designed to deliver a specific outcome: real assets for real diversification

2017
fourth quarter

Protecting purchasing power through varying market environments.

The Principal Diversified Real Asset CIT seeks to provide:

A diverse blend of real assets.

Allocating to a diversified real asset strategy may improve your returns through various market environments by:

- Aiming to protect purchasing power.
- Providing the opportunity for long-term diversification benefits.
- Enhancing the total return potential for a portfolio.

Enhanced return potential through economic cycles.

Real assets may provide the potential for growth whether the economy is booming or stagnant by:

- Balancing real return/real asset strategies to mitigate undesired risk.
- Focusing on the broad universe of real return/real asset classes that have exhibited low correlation to traditional asset classes.
- Using research and modeling techniques to target the most favorable blend of each asset class to seek optimal risk/return potential.

A multi-manager, multi-asset approach.

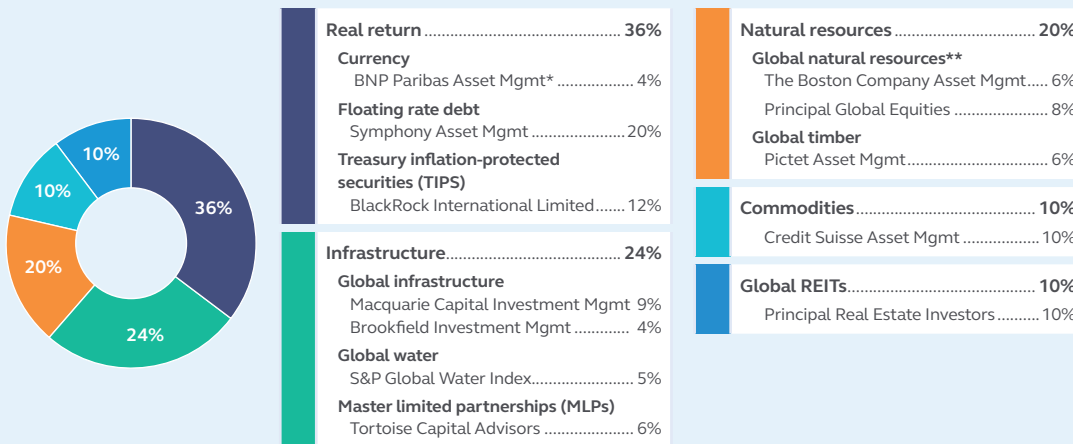

Combining asset allocation expertise and access to global investment management¹ by:

- Hiring specialist investment managers to target broad inflationary market concerns.
- Offering flexibility and transparency through a portfolio of separate accounts.
- Providing dynamic asset allocation toward a targeted risk-return profile.

Blending multiple strategies in a single fund

Portfolio allocations (as of 12/31/2017)

Investment managers

May not reflect current allocations or investment managers. Percentages may not add up to 100% due to rounding.
 *Effective June 1, 2017, Fischer Francis Trees & Watts, Inc. (FTW), a sub-advisor for the currency sleeve, changed its name to BNP Paribas Asset Management, Inc.
 **During the fourth quarter of 2017, we enhanced our global natural resources investment portfolio to include a blend of an actively-managed portion sub-advised by The Boston Company Asset Management, LLC and passively-managed portion managed by Principal Global Equities. We consolidated the global metals and mining and global agriculture investment portfolio to reduce overlap with the new global natural resources portfolio.

¹Investment managers were selected using a proprietary process, characterized by a comprehensive and continuous review of all investment managers.

Portfolio strategy & management

The Diversified Real Asset CIT is managed by Principal Portfolio Strategies. The investment objective is to achieve a long-term total return in excess of inflation.

Returns represent past performance and do not guarantee future results. Share price, principal value, and return will vary and you may have a gain or loss when shares are sold. Current performance may be lower or higher than quoted. For the most recent month end performance, visit principalfunds.com.

²Diversified Real Asset Strategic Index is composed of 35% Bloomberg Barclays U.S. Treasury TIPS Index, 20% S&P Global Infrastructure Index, 20% S&P Global Natural Resources Index, 15% Bloomberg Commodity Index, and 10% FTSE EPRA/NAREIT Developed Market Index.

³Index performance information reflects no deduction for fees, expenses, or taxes. Indices are unmanaged and individuals cannot invest directly in an index.

⁴The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar ratings do not reflect the inclusion of sales charges. If sales charges were reflected, ratings could be lower. © 2018 Morningstar, Inc. All rights reserved. The Principal Diversified Real Asset Collective Investment Trust (CIT) is a collective investment trust maintained by Principal Global Investors Trust Company (the Trust Company). The Trust Company has retained Principal Global Investors LLC (the

Adviser), to serve as investment adviser with respect to the CIT, subject to the Trust Company’s supervision and review. The Adviser is an indirect wholly owned subsidiary of Principal Financial Group, Inc., and is under common control with the Trust Company. The CIT is available only to certain qualified retirement plans and governmental 457(b) plans.

The CIT is not a mutual fund and is not registered with the Securities and Exchange Commission, the State of Oregon, or any other regulatory body. Units of the CIT are not deposits or obligations of, guaranteed by, or insured by the Trust Company or any affiliate, and are not insured by the FDIC or any other federal or state government agency. The value of the CIT will fluctuate so that when redeemed, units may be worth more or less than the original cost. The declaration of trust, participation agreement, and disclosure documents contain important information about investment objectives, risks, fees, and expenses associated with investment in the CIT and should be read carefully before investing. The declaration of trust is available at principal.com. A copy of the participation agreement can be obtained from your plan administrator.

Insurance products and plan administrative services provided through Principal Life Insurance Co., a member of the Principal Financial Group®, Des Moines, IA 50392. Certain investment options and contract riders may not be available in all states or U.S. commonwealths.

Asset allocation and diversification do not ensure a profit or protect against a loss. Fixed-income investments are subject to interest rate risk; as interest rates rise their value will decline. The U.S. government does not guarantee the principal or coupon payments of non-U.S. Treasury bonds. Investments in natural resource industries can be affected by disease, embargoes, international/political/economic developments, variations in the commodities markets/weather and other factors. Investing in derivatives entails specific risks regarding liquidity, leverage and credit that may reduce returns and/or increase volatility.
