

Voluntary Rollover Income Option

Retiree Income for Life

Guarantee income for life with a Voluntary Rollover Income Option

Provide an outside-the-plan annuity option, help limit ERISA fiduciary liability, reduce administrative burdens and provide guaranteed¹ income for retirees — all with a Voluntary Rollover Income Option.

A solution for today's retirement landscape

Increased life expectancies and the inability to rely as much on past sources of retirement income, like Social Security or employer-sponsored defined benefit plans, force people to take more responsibility for accumulating savings — and managing it throughout retirement.

Retirees want and need the security of guaranteed lifetime income — a benefit income annuities provide. You can offer this valued benefit without adding to your administrative workload or expense with Principal Income ProviderSM.

Principal Income ProviderSM is a suite of institutionally priced solutions that provides guaranteed, lifetime income for tax-qualified and nonqualified situations. Offered by Principal Life Insurance Company, the Voluntary Rollover Income Option allows employees to roll some or all of their retirement savings into an annuity.

Flexibility you need

With the Voluntary Rollover Income Option, we provide a broad scope of services and can develop an effective program tailored to your needs and your desired level of involvement. Here is a general illustration of how we might work together:

- We work with you to provide easier access to the Voluntary Rollover Income Option.
- Then, we develop a customized service plan to provide desired education. Employees can access a toll-free help line that connects them to retirement specialists.
- At retirement, an employee's proceeds from the employer-provided retirement plan are moved into a Voluntary Rollover Income Annuity, providing guaranteed income for life.
- All services combine into a flexible solution that offers guaranteed income for life and customizable features for managing service delivery.

¹ Guarantees are based on the claims-paying ability of the issuing insurance company.
